FSC® Hardwood

The Forest Stewardship Council (FSC®) is an international organisation dedicated to worldwide conservation and responsible forest management. The FSC® promotes a suitable balance between environmentally appropriate, socially beneficial and economically viable management of the world's forests.

Wood and paper products originating from an FSC®-certified forest are recognised by the FSC® label. To ensure that products with this quality mark actually come from a responsibly managed forest, all links in the supply chain, from processing to manufacturing to distribution, must be certified.

Streetlife is FSC® certified and is therefore part of the COC 'Chain of Custody' for three variants: FSC®-100% (all the wood comes from an FSC®-approved source), FSC®-Mix (wood comes partly from an FSC®-approved source) and FSC®-Recycled (wood that is recycled under specific conditions).
